

# LifeStyle ELECTRONICS

## COMMERCIAL

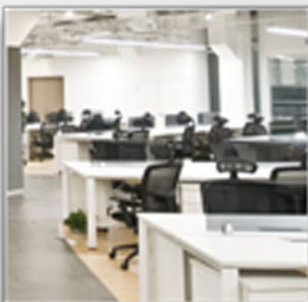

### Broadcast

Take full control of the newest Lifestyle Electronics' building automation and Audio-Video control technologies in broadcasting by handling our high-bandwidth and modular Audio-Video switching, process and scaling and digital signage systems. With sophisticated media and recording control features, lighting control system, to highly reliable and fail-safe audio and video management, Lifestyle Electronics' intelligent control systems can automate multiple equipment actions and functions based on studio needs.

### Education

Lifestyle Electronics gives you powerful tools to enhance learning experience for students. We offer interactive white boards supporting video and sound. We can take care of climate control and lighting control systems to enable creating powerful learning experience. Our online solution supports e-learning, messaging and communication.

### Corporate Enterprise

Lifestyle Electronics let you focus on the core of your business and corporate boardroom. We replace tens of various remotes and devices with one familiar touch screen controller. We create simple and intuitive solution for you to manage presentation, teleconferencing and even climate or lighting

## Hotels and hospitality

With Lifestyle Electronics system you can take total control of security, temperature and energy efficiency in your hotel, casino or restaurant:  
Onsite and remote control with just one device  
Lighting control systems, with motion sensors and intelligent lighting to lower energy costs and create phenomenal customer experience.

## Retail & real estate

With Lifestyle Electronics you can create ultimate shopping experience for potential buyers. Set up interactive tours for potential property buyers or create digital shop front with commercial automation.  
Transform your shop or whole shopping centre with Lifestyle Electronics' technology. Centrally control lighting and temperature based on outside status. Preserve energy to lower costs and let your customers feel comfortably.

## Luxury transport

Lifestyle Electronics can create same experience on your yacht as you have in your smart home. You can cruise freely and our one touch system can take care of your lighting, temperature, shade and of course all your electronics. You can remotely control your house's security and manage conserving energy.  
Lifestyle Electronics will make it happen. We will make on-water cruising experience, flight experience pleasant and interesting, like you have never left your home.
