## RESIDENTIAL

### Home automation & control

Lifestyle Electronics is a leading provider home automation and control systems. With just one device you can control temperature, music and lighting in your house. Houses and apartments are equipped for home working, multi-room entertainment and flexible living. Intelligent home systems and enhanced entertainment flexibility are simple and relatively low-cost.

### Home cinema system

Lifestyle Electronics supplies a range of high end Home cinema systems. With one remote, control your Home cinema system to:  
Control everything from lighting to temperature and blackout curtains;  
Control surround sound  
Display full high definition image from sources such as DVD, BluRay, SKY HD, Apple TV, etc.  
Enjoy Smart TV online services like YouTube or Netflix

### Multi-room sound systems

Lifestyle Electronics has a solution for you to enjoy sound from many sources like iPod, CD players or satellite receivers. With our Multi-room sound systems your family can enjoy different music in each part of the house. News radio in the kitchen, soft music in the bedroom and work out music on the patio. Our Multi room sound system is easy to use for any member of the family. It is operated using a simple point-and-click remote or an iPhone / iPad.

## Central Lighting controls

Lifestyle Electronic's central lighting control system goes beyond simply adjusting light in your house. Our lighting control system, whether you are home or away, allows you to: Automatically control lighting to suit your needs. Create lighting scene for nighttime, holiday mode and other periods. Turn off all internal lights with one touch of the button to activate night mode in your house.

## Mood lighting systems

Lifestyle Electronics supplies mood lighting systems that are LED based and energy efficient. With digital controls of home automation system you can choose any colour light to suit your mood and situation.

## Home networking

We can develop a network of access point to suite your automation needs. It makes it easy to roam around your house and still have great wireless signal wherever you are. Lifestyle Electronic's gateway – firewall and antivirus products take care of your security protecting you from hacking attempts, viruses and Trojan horses.

## Energy monitoring and management

Lifestyle Electronics bears in mind ecological aspect of your home automation. We design system that allows you to take full control of thermostat, windows shades and drapes. Our system enables you to reduce energy consumption, save money without need to sacrifice a comfort that you are used to. We will implement system that brings together thermostat and shades to reduce demand for heating, bringing your bills down.

## Remote control systems

Imagine being able to remotely control lighting, temperature, shades or drapes in your house. Lifestyle Electronics smart home systems makes it possible for you to enjoy the newest technology. Imagine being able to switch on the heating half an hour before coming from work on a winter day. Or maybe turning on the evening light, when you are not home to make it look like there is someone inside.
